Instagram | Facebook | WhatsApp

PROFILE

Front-End Developer with a programming learning journey that began in 2022 and professional front-end experience beginning in August 2025. Focused on building responsive, interactive websites with HTML, CSS and JavaScript, with an interest in clean structure and practical user experiences.

TECHNICAL SKILLS

Core: HTML5, CSS3, JavaScript
Front-End: Responsive layouts, interactive UI, semantic markup
Tools / Delivery: GitHub, Vercel (based on portfolio projects)

EXPERIENCE

Front-End Developer | August 2025 – Present

Working in front-end development and building websites using HTML, CSS and JavaScript. Practical project work includes responsive pages, multi-section websites and interactive web experiences.

SELECTED PROJECTS

Ibiar Official Language School Website (2025) — Built a complete school website with multiple sections and pages, including admissions, gallery and contact.

Left Behind (2026) — Created an interactive educational website featuring stories, clickable maps, a timeline and a quiz.

The Crossing (2026) — Developed an interactive historical archive with a phased map, photographs, video and story filters.

LEARNING & DEVELOPMENT

Started learning programming in 2022, progressing through web development fundamentals and JavaScript, and continuing to strengthen front-end development skills through practical projects.
